

BusinessObjects XI 3.0: Advanced Universe Design

DM351V3.0

Course Description

This two-day instructor-led advanced course is designed to give you the comprehensive skills and in-depth knowledge needed to design universes in BusinessObjects Universe Designer.

The business benefit of this course is that you will learn best-practice methodology for creating universes that respond to your reporting requirements. Through well-designed universes, report designers and business users will be able to create reports without having to know anything about the underlying data source or structure.

Who should attend?

The target audience for this course is anyone responsible for creating and designing universes using a BusinessObjects Enterprise XI R2 or XI 3.0 environment. The learners who attend the course will be most successful if they have experience in working with Business Objects Universe Designer.

Course Agenda

1 Reviewing Universe Design Concepts

- Use your universe design and BusinessObjects Universe Designer knowledge to solve business problems

2 Working with Aggregate Awareness

- Define aggregate awareness
- Apply aggregate awareness to objects

3 Designing Advanced Objects

- Combine database functions in objects
- Construct relative date-time objects
- Work with analytic functions

4 Creating Complex Predefined Conditions, LOVs, and Joins

- Create complex predefined conditions
- Work with advanced LOVs
- Work with advanced join syntaxes

5 Securing Universes

- Define connection and user credential parameters
- Work with Central Management Server (CMS) universe security

6 Implementing Universe Life Cycle Management

- Move content from development to production

7 Maintaining and Optimizing Universes

- Maintain universes
- Optimize universes
- Apply best practices for universe design

8 Creating Universes from Other Data Sources

- Create a universe from an XML metadata file
- Create stored procedure and JavaBeans universes
- Work with OLAP universes
