

BusinessObjects Web Intelligence XI R1/R2: Advanced Report Design (Rev A) QA320R2

Course Description

Web Intelligence™ is a query, reporting and analysis tool that allows report designers to access the data in their corporate databases directly from within BusinessObjects Enterprise™ InfoView™ and to present and analyze this information in a Web Intelligence document.

This course is designed to give you the comprehensive skills needed to apply alternative query and reporting techniques when creating complex Web Intelligence documents. After completing this course, you will be able to combine queries and use sub-queries. You will also be able to use character and date string functions, create variables using "If" logic, redefine calculation contexts, as well as use advanced reporting techniques such as formatting breaks and using custom sorts.

BusinessObjects XI R1 and BusinessObjects XI R2

This course is designed to teach you, using both versions of the XI release, how to apply advanced reporting techniques in the creation of documents using Web Intelligence. New features covered in this courses that are not applicable to BusinessObjects XI Release 1 include:

- Combining queries using union, intersection and minus
- Using sub-queries
- Creating custom sorts
- Overriding a report filter or ranking with the NoFilter() function

Course Audience

The target audience for this course is report designers who are experienced Web Intelligence users and who need to create advanced Web Intelligence documents.

Course Topics

Lesson#1 - Advanced Query Techniques

- Using combined queries
- Using sub-queries
- Creating a query based on another query

Lesson#2 - Character and Date String Functions

- Using the character string functions
- Concatenating different data types
- Using date functions

Lesson#3 - Using If Logic

Grouping data using If() logic
Using If() to modify calculation behavior

Lesson#4 - Advanced Reporting Features

Formatting breaks
Creating custom sorts
Displaying document data in free-standing cells
Overriding filters and ranking

Lesson#5 - Calculation Contexts

Understanding calculation contexts
Redefining the calculation context
