

Crystal Reports XI: Report Design 3 Report Processing Strategies

RD310

Course Description

This course is designed to give learners comprehensive skills and in-depth knowledge to plan and create reports that will help them analyse and interpret important information.

As a business benefit, learners will find that their increased understanding of reporting processing, formulas, custom functions and subreports will help them make more effective report design decisions and create more efficient reports.

Who should attend?

This course is designed for report designers, who have taken CR: Report Design I – Fundamentals of Report Design and CR: Report Design II – Business Reporting Solutions and who are responsible for creating and distributing reports.

Course Agenda

Describing Report Processing

- Describing multipass reporting
- Using evaluation time functions
- Using a dynamic array

Creating complex formulas

- Creating complex formulas
- Using loop control structures
- Using arrays functions and loops
- Using nested functions

Using Custom Functions

- Creating custom functions
- Using custom functions
- Modifying custom functions

Using Subreports

- Defining subreports
- Creating an unlinked subreport
- Creating a linked subreport
- Creating an on-demand subreport
- Using shared variables in a subreport
- Using subreports to link “unlinkable” data
