

BusinessObjects Enterprise XI: Administering Servers

SA310R2

Course Description

This 3-day instructor-led course explains and demonstrates what each server component in BusinessObjects Enterprise does and how it is configured. The learners will install and configure each component and learn how information flows from server to server for system processes such as logging on to the system, scheduling reports, and viewing reports. Learners will learn to use the Central Management Console (CMC) and the Central Configuration Manager (CCM) to manage and configure the servers and will also practice troubleshooting system problems when they arise.

The business benefit of this course is that it provides a foundation for System Architects/Administrators who are responsible for setting up and maintaining a BusinessObjects Enterprise platform

BusinessObjects XI R1 and BusinessObjects XI R2

In order to accommodate both XI R1 and XI R2 audiences, this course addresses the functionality of XI R1 while identifying XI R2 content using the BusinessObjects XI Release 2 to help students differentiate between the content that does not apply to XI R1 audiences.

This icon has been placed throughout the guide to identify features that are specific to BusinessObjects XI Release 2.

Course Audience

The target audience for this course is System Architects/Administrators who are responsible for setting up and maintaining a BusinessObjects Enterprise platform.

Course Agenda

Lesson #1 - BusinessObjects Enterprise Architecture

- Understanding Business Intelligence
- Understanding the BusinessObjects Enterprise architecture
- Information process flows in BusinessObjects Enterprise

Lesson #2 - Preparation and Installation of BusinessObjects Enterprise

- Preparing and Installing BusinessObjects Enterprise

Lesson #3 - Performing Common Server Management Tasks

- Describing server management tools
- Using the Central Configuration Manager (CCM) to manage servers
- Using the CMC to manage servers

Lesson #4 - Managing the Web Application Services

- The web application services
- Configuring the Java Web Application Server and the Java Web Component Adapter
- Configuring the .NET Web Application Server and the .NET Web Component Adapter
- Configuring the web application services to communicate across a firewall

Lesson #5 - Managing the Central Management Server and the Repository

- The role of the Central Management Server
- Migration and backup of CMS system data
- Clustering Central Management Servers
- Managing auditing

Lesson #6 - Managing the File Repository Servers

- The role of the File Repository Servers
- Configuring the File Repository Servers

Lesson #7 - Managing the Crystal Reports Servers

- The roles of the Crystal Reports servers
- Configuring the Crystal Reports Servers
- How to set and run a schedule for a report

Lesson #8 - Working with List of Values(LOV) Objects

- The role of the LOV Job Server and LOV objects
- Configuring the LOV Job Server
- How LOV objects are processed

Lesson #9 - Managing the Web Intelligence Servers

- The role of the Web Intelligence servers

Lesson #10 - Managing the Desktop Intelligence Servers

- Responsibilities of the Desktop Intelligence servers
- Configuring the Desktop Intelligence Report server
- Configuring the Desktop Intelligence Cache server
- Publishing Desktop Intelligence documents
- Using 3-tier Desktop Intelligence mode

Lesson #11 - Managing the Destination Job Server

- The role of the Destination Job Server
- Configuring the Destination Job Server
- Setting a schedule to send an object or instance to a destination
