

# BusinessObjects Enterprise 3.0: Administering Servers—Windows

SA310V3.0

## Course Description

This three-day instructor-led course explains and demonstrates what each server component in BusinessObjects Enterprise does and how it is configured. You will install and configure each component and learn how information flows from server to server for system processes such as logging on to the system, scheduling reports, and viewing reports. You will learn to use the Central Management Console (CMC) and the Central Configuration Manager (CCM) to manage and configure the servers and will also practice troubleshooting system problems when they arise. The business benefit of this course is that it provides a foundation for system architects/administrators who are responsible for administering servers on the BusinessObjects Enterprise platform.

Note: This course was developed based on the product availability of Java only. A course addendum and future revision will reflect any changes in functionality or new features introduced in .NET.

## BusinessObjects Edge Series XI 3.0

Note: This course also applies to you if you are a system administrator for BusinessObjects Edge Series. Any product differences between BusinessObjects Edge and BusinessObjects Enterprise are outlined within the course so you understand which areas do not apply to your deployment. A document with more information about these differences and how this course applies to you is included on the resource CD.

## Who should attend?

The target audience for this course is system architects/administrators who are responsible for setting up and maintaining a BusinessObjects Enterprise platform.

## Course Agenda

### 1 Preparing, Installing and Configuring BusinessObjects Enterprise

- Explain how to prepare, install, and configure BusinessObjects Enterprise
- Test BusinessObjects Enterprise once it is installed
- Verify what updates were applied to the BusinessObjects Enterprise installation (Post Install Maintenance)

### 2 BusinessObjects Enterprise Architecture

- Describe the BusinessObjects Enterprise architecture
- Describe the BusinessObjects Enterprise components
- Explain the information process flows in BusinessObjects Enterprise

### 3 Performing Common Server Management Tasks

- Describe the Central Configuration Manager (CCM) to manage servers
- Describe the Server Intelligence Agent (SIA)
- Describe the Central Management Console (CMC) to manage servers

### 4 Managing the Web Application Services

- Understand the web application services
- Configure the Java Web Application Server
- Deploy BusinessObjects Enterprise web applications using wdeploy

### 5 Managing the Central Management Server and the System Database

- Use the Central Management Server
- Migrate and backup the CMS system data
- Manage auditing
- Describe authentication and single sign-on
- Map third-party accounts to BusinessObjects Enterprise

### 6 Managing the File Repository Servers

- Use the File Repository Servers
- Configure the File Repository Servers
- Use the Repository Diagnostic Tool

### 7 Managing the Web Intelligence Servers

- Describe the role of Web Intelligence servers
- Configure the Web Intelligence servers
- Describe how documents viewing requests are processed by the Web Intelligence servers
- Describe how scheduling requests are processed by the Web Intelligence servers
